

Digital Hire Rates

Imacon 132c 22 megapixel back – including ipress image bank

The imacon 132c is a 22 megapixel digital back for medium format cameras.

The system is configured to allow tethered control from a laptop computer via firewire, or continuous untethered shooting to a pocket hard drive, - (of up to 800 raw files at a 1.2 second recycle rate), making it the most popular digital back on the market in both the UK and US.

Studios twenty4 is offering the Imacon at a competitive rental rate as a component of our digital service. Our operator handles all archiving and file management aspects of the workflow, providing secure yet easy access to files for both the photographer and client. Digital selection sheets can be provided at the end of the shoot, or the following day to assist with editing. Our operator is currently equipped to work with mamiya RZ, 645AFD, hasselblad V series, and hasselblad H1 & H3 cameras.

1 Day Hire excluding GST
